

## ELLAN - Developing European Core Competencies Framework (ECCF)

The results of the following studies will contribute to developing the ECCF

### Older people's views on competencies of health and social care professionals

- qualitative approach
- over 90 semi-structured interviews of older people in 6 countries

ECCF will be an instrument to get the right knowledge, skills and attitude implemented in the curricula at the higher social and health care education institutes

### Competencies required in older people's care

- literature review and desk research including papers from across the European countries

### European Core Competencies Framework for working with older people

### Professionals' views on competencies

- quantitative approach
- modified CNPI (Caring Nurse Patient Interaction) questionnaire for hundreds of health and social care professionals in 6 countries

### Innovative learning approaches to working with older people

- qualitative approach
- desk research and survey for tens of education institutions in 5 countries

### Social and health care students' opinion of factors influencing working with older people

- literature review + quantitative approach
- the Kogan (Attitudes toward old people) and Nolan (Students' perceptions of work with older people) scales
- questionnaires for hundreds of students in 5 countries
